

User Manual & Safety Information for Cavlux Saddle Box

Thank you for choosing the Cavlux saddle box.

Our product has been designed with comfort, aesthetics, and durability in mind, while ensuring safe use.

This document provides guidelines for care, use, and maintenance, as well as essential information on safe handling, in line with the requirements of Regulation (EU) 2023/988 on general product safety (GPSR).

Available Models

- **Model Pony Rider** – designed for one saddle and essential accessories for a young rider.
- **Model Junior Rider** – medium-sized model, holding up to two saddles and equipment for daily training.
- **Model Superior Rider** – the most spacious Cavlux saddle box, designed for two saddles and full equipment for both training and competition.

Safety Instructions

- Do not sit, stand, or climb inside the box. It is not a load-bearing surface and must not be used for transporting people.
- Keep your hands away from hinges and locks while closing to avoid pinching.
- Do not allow children to play with the box or its components.
- For models on wheels, always secure the box to prevent uncontrolled movement during loading and unloading.
- Do not drill, modify, or alter the box – this may compromise safety.
- Do not store flammable, sharp, or toxic materials inside the box.

✓ Care & Maintenance

- Clean regularly with a soft, slightly damp cloth.
- Avoid aggressive detergents, abrasive cleaners, and rough sponges that may damage the surface.
- Protect from excess moisture and water exposure.
- The box is not permanently waterproof – store it in a dry place or under cover to avoid aluminium corrosion.
- If it gets wet (e.g., in rain), simply dry it thoroughly. If liquid spills inside, remove it and wipe the interior dry. For strong odours, keep the box open to ventilate.
- Use the box only for its intended purpose – storing and transporting equestrian equipment.
- Do not overload. Each box is designed for a specific capacity:
 - Pony – 1 saddle
 - Junior / Superior – 2 saddles
- Overloading can cause damage to runners, wheels, or hinges.
- Do not force the doors. If they do not close, check if the contents are properly arranged. Forcing closure may cause permanent damage.
- Avoid impacts and scratches.
- Treat your box like a valuable piece of furniture – it is an investment built to last for years.

What to Avoid

- Do not expose the box to direct rainfall or snow without cover.
- Do not wash with a pressure washer or immerse in water.
- Do not transport liquids in open containers inside the box.
- Do not vacuum the interior with a turbo brush.
- Do not perform unauthorised mechanical modifications.

Final Information

- The Cavlux saddle box is designed for storing equestrian equipment. It meets the general safety requirements in accordance with Regulation (EU) 2023/988 of the European Parliament and Council on general product safety.
